Create a Blob Container in Azure Storage (SOP)

Task: Create and configure a blob container in an Azure Storage Account.

- Set up a new container, configure access permissions, and enable anonymous access for blob data.
- Adjust network settings to allow public access to the container, which ensures that it can be accessed over the internet.
- Configure blob containers for different access scenarios, including anonymous and public access.
- Upload and manage content within the blob container.

This storage account's 'Firewalls and virtual networks' settings may be blocking access to storage services. Try adding your client IP address ('174.175.82.248') to the firewall exceptions, or by allowing access from 'all networks' instead of 'selected networks'. Learn more
