

Resize an Azure Virtual Machine (SOP)

Task: resize an existing Azure Virtual Machine using the Azure portal.

- Adjust the resources allocated to your virtual machine for a critical task
 - Increase or decrease CPU and memory to match workload (CPU and resource) requirements
 - Optimize virtual machine performance and reduce cost
- Select a different size, apply filters to find the appropriate VM size, and finally resize the VM.
- Verify and confirm that the VM has been resized successfully
- Estimate the impact & downtime from resizing a virtual machine.

Virtual machine and CPU settings

- Target VM: SRV01
- New VM Size: D2s_v3\
- vCPU filter: 2 vCPUs

Click vCPUs filter

Microsoft Azure portal showing the 'Size' selection page for virtual machine SRV01. The page displays a list of VM sizes with filters for vCPUs (set to 8) and RAM (GIB) (set to All). A modal dialog is open, prompting the user to 'Select 2' vCPUs. The list of VM sizes includes D-Series v4, DC-Series, E-Series v4, F-Series v2, N-Series, E-Series v3, D-Series v2, Non-premium storage VM sizes, Previous generation sizes, Size not available, Insufficient quota - family limit, Unsupported generation, and Incompatible with accelerated networking.

Microsoft Azure portal showing the 'Size' selection page for virtual machine SRV01. The page displays a list of VM sizes with filters for vCPUs (set to 2) and RAM (GIB) (set to All). A modal dialog is open, prompting the user to 'Click D2s_v3'. The list of VM sizes includes D-Series v3, DC-Series, E-Series v4, F-Series v2, D-Series v3, E-Series v3, D-Series v2, Non-premium storage VM sizes, Previous generation sizes, Size not available, Insufficient quota - family limit, Unsupported generation, and Incompatible with accelerated networking.

Microsoft Azure portal showing the 'Size' tab for a virtual machine (SRV01). The interface displays a list of available VM sizes, categorized by 'Most used by Azure users' and 'Previous generation sizes'. A blue callout bubble points to the 'Resize' button at the bottom left of the page.

VM Size: **Standard_D2s_v3**

VM Size	Type	vCPUs	RAM (GiB)	Data disks	Max IOPS	Local storage (GiB)	Premium disk	Cost/month
D2s_v3	General purpose	2	8	4	3200	16 (SCSI)	Supported	\$137.24
D2as_v4	General purpose	2	8	4	3200	16 (SCSI)	Supported	\$137.24
D2s_v2	General purpose	2	7	8	6400	14 (SCSI)	Supported	\$173.74

Click Resize button

Microsoft Azure portal showing the 'Size' tab for a virtual machine (SRV01). A modal dialog box titled 'Resize this virtual machine' is displayed, asking for confirmation to resize the VM. A blue callout bubble points to the 'Resize' button within the dialog.

Resize this virtual machine

Do you want to resize to size 'Standard_D2s_v3'? If the virtual machine is currently running, changing its size will cause it to be restarted.

Buttons: **Resize** (highlighted), Cancel

Click Resize
